Children of GAZA

The first really serious memecoin

## Tokenomics

COGA is a coin on the SOLANA blockchain

- 1,000,000,000 tokens minted
- 20% in Liquidity Pool ( 100% will be locked )
- 20% whitelisted presale + unlocked tokens
- 40% fair launch/presale,
  - 50% of presale directly locked in LP
  - 50% of presale to token stabilization and marketing
- 20% airdrops, influencers
  
- 5% transaction tax is used for donation

## COGA donation

- On each COGA transaction, a 5% donation fee is charged.
- COGA will donate on regular basis to Save the Children
- Proof of donation will be shared through X and Telegram
- The more you trade, the more you aid the Children of Gaza

# CHILDREN ARE PAYING THE HEAVIEST PRICE OF THIS WAR.

These past 9 months have been **hell on earth for children in Gaza**. They have lost homes, loved ones, the safety to which they have a right – and in many cases, their lives.

Children in Gaza are being killed by bombs and bullets at an unprecedented rate. They are **dying from hunger and disease at the fastest pace on record**.

On top of this, **over 20,000 children are currently missing** in the chaos of war. Thousands are **presumed dead beneath the rubble**. Others have been **harmed beyond recognition** by explosives, **buried in unmarked or mass graves**, or have been **detained or abducted**.

**Almost every child who has managed to survive the past 8 months of war is now in the line of fire in Rafah.**

The increased attacks and violence have now forced nearly 1 million people that were initially taking refuge in Rafah, to relocate yet again **towards the Israeli-designated so-called "humanitarian zones"**, including Al-Mawasi, Deir Al Balah and Khan Younis.

Children of GAZA

## COGA donation – reference calculation

### Why is a 5% tax token so interesting for a charity token?

If we would have kept 10% apart from the LP, we could have only donated 10% of the value of COGA at any given time. With a 5% tax, donations can go to the moon together with COGA. Here is an example:

- Suppose the value of COGA is USD 1.00 at the start
- 5% = \$ 0.05
- Suppose each week, the value increases with \$1.00, then the donation fee is as follows each time 1 COGA is traded:
  - Week 1: \$ 0.05
  - Week 2: \$ 0.10
  - Week 3: \$ 0.15
  - Week 4: \$ 0.20
  - Week 5: \$ 0.25
  - Week 6: \$ 0.30
  - Week 7: \$ 0.35
  - Week 8: \$ 0.40
  - Week 9: \$ 0.45
  - Week 10: \$ 0.50

**Total donation = \$ 2.75 = 275% of the initial token value!**

**More Trade = More Aid**
